

3CX Silent Mode for Android

Silent Mode

Silent Mode is a device-only configuration which is independent of your status. If you want to be alerted about incoming calls or chat messages, and do not want your extension ringing on your app then enable “**Silent Mode**” from within the App. Enable this via a long press on the app icon on your home screen.

You can also:

- Pause app notifications on Android 10 for the rest of the day by long-pressing and tapping on the hourglass icon. To re-enable notifications tap on the app and select “**Unpause app**”.
- Drag and place “**Silent Mode**” as a widget on your screen. Tap on the icon to toggle “**Silent Mode**” on or off.
